**QUESTION 1**

Which of the following statements is true? Select the correct answer.

A. REST services primarily rely on the use of SOAP headers to exchange message metadata.

B. REST services primarily rely on the use of JMS headers to exchange message metadata.

C. REST services primarily rely on the use of HTTP headers to exchange message metadata.

D. REST services do not exchange messages with headers.

Correct Answer: C

---

**QUESTION 2**

Which of the following technologies has a namespace pre-defined by an industry standards organization? Select the correct answer.

A. WS-Addressing

B. REST

C. Web 2.0

D. Because all Web-based technologies are required to have namespaces, all of the above technologies have pre-defined namespaces.

Correct Answer: A

---

**QUESTION 3**

It is possible to have 3 SOAP-based Web services, each with a WSDL definition that has an operation named Update. Select the correct answer.

A. True

B. False

Correct Answer: A

---

**QUESTION 4**

Which of the following statements are true? SELECT ALL THAT APPLY

A. XML and XML Schema can be used to help define the technical service contract of a SOAP-based Web service.

B. XML and XML Schema allow for the creation of data models that can be used by services, but can also establish a separate data architecture.

C. XML and XML Schema are always used to define the structure of the underlying service logic as well as the component composition models the services may need to encapsulate.

D. XML and XML Schema are important because when services are built as Web services, they must be used to define service scalability characteristics and thresholds, as established by the infrastructure.

Correct Answer: AB

**QUESTION 5**

Which of the following statements are true? SELECT ALL THAT APPLY

A. A service can exist as a component.

B. A service can exist as a SOAP-based Web service.

C. A service can encapsulate one or more components.

D. A service can encapsulate one or more SOAP-based Web services.

Correct Answer: ABC
