**QUESTION 1**

An RFP for a Interactive Voice Response (IVR) unit and mid-sized communication system has been released. You are responsible for determining the design solution. The RFP states that the IVR platform must be engineered to handle 135 25-second messages during the busy hour. You calculate this requirement to equal 47 ports. If you provide 47 ISDN PRI trunks (two ISDN PRI facilities), which two traffic concerns must you consider? (Choose two.)

- A. No trunk growth is available on the ISDN PRI facilities.
- B. 47 active trunks overload the two ISDN PRI facilities, seriously affecting traffic load and call completions.
- C. Considering there is only one channel for signaling, a backup D channel cannot be provided, affecting traffic if the D channel fails.
- D. ISDN PRI facilities direct from the central office limit the caller's ability to connect to the proper resource, causing increased usage.

Correct Answer: AC

---

**QUESTION 2**

What are four best practices for delivering high quality audio? (Choose four.)

- A. Using 802.1p/Q within Ethernet LANs
- B. Using G.711 on LANs and G.729 on WANs
- C. Using Differentiated Services within routers
- D. Using VLANs to separate voice from data traffic
- E. Using silence suppression to conserve bandwidth

Correct Answer: ABCD

---

**QUESTION 3**

A major call center outsourcer is in the process of implementing a disaster recovery location and is placing an S8500 Media Server configured as an Enterprise Survivable Server (ESS) at their backup facility. To successfully design a solution that meets the customer needs for survivability and prioritization, what must be done when deploying and administering the ESS servers? (Choose two.)

- A. Avoid overloading the network resources with excessive call traffic
- B. Avoid fragmenting the system so the ESS server controls as much of the network as possible
- C. Ensure that the Manual Backup Server is configured in the priority list of each IP Server Interface (IPSI)
- D. Ensure that every Local Survivable Processor (LSP) is aware of any G650 Media Gateways that will register to it in

the event of a network outage

Correct Answer: AB

---

#### QUESTION 4

Which is NOT a service performed by the SIP Enablement Services (SES) Server?

- A. Proxy Server
- B. Location Server
- C. Session Boarder Controller
- D. Registrar

Correct Answer: C

---

#### QUESTION 5

Assuming a random call arrival rate, which traffic theory is used when blocked calls are rerouted and never return to the original group?

- A. Erlang A
- B. Erlang B
- C. Erlang D
- D. Centum Call Seconds (CCS)

Correct Answer: B
