### QUESTION 1

You have been assigned to configure a DMZ that uses multiple firewall components. Specifically, you must configure a router that will authoritatively monitor and, if necessary, block traffic. This device will be the last one that inspects traffic before it passes to the internal network. Which term best describes this device?

- A. Screening router
- B. Bastion host
- C. Proxy server
- D. Choke router

Correct Answer: D

---

### QUESTION 2

Your organization has made a particularly unpopular policy decision. Your supervisor fears that a series of attacks may occur as a result. You have been assigned to increase automated auditing on a server. When fulfilling this request, which of the following resources should you audit the most aggressively?

- A. Authentication databases, including directory servers
- B. Intrusion detection systems, especially those placed on sensitive networks
- C. Log files on firewall systems
- D. Firewall settings for desktop systems

Correct Answer: A

---

### QUESTION 3

Which of the following organizations provides regular updates concerning security breaches and issues?

- A. IETF
- B. ISO
- C. ICANN
- D. CERT

Correct Answer: D

---

### QUESTION 4

Which of the following applications can help determine whether a denial-of-service attack is occurring against a network

host?

- A. Thenetstat command and a packet sniffer
- B. Theps command and a network scanner
- C. The ping command and User Manager
- D. Theiptables command and Windows desktop firewall

Correct Answer: A

---

#### **QUESTION 5**

Which of the following is a typical target of a trojan on a Linux system?

- A. Kernel modules
- B. Shared libraries
- C. Boot sector files
- D. System32 DLL files

Correct Answer: A
