QUESTION 1

A system administrator needs to quickly deploy Windows 7 to several new computers without preconfigured operating systems. The administrator decides to use an existing Ghost image since the necessary drivers have already been added to the DeployAnywhere database. The PXE Configuration is set to respond only to known computers. How should the administrator proceed?

- A. Use Ghost Solution Suite to distribute the image as the computers boot to the network.
- B. Import the list of new computers into the Management Console and assign an imaging task.
- C. Deploy an Automation Folder to the new computers to prepare them for imaging.
- D. Configure PXE to respond to a known list of MAC addresses and deploy the images only to the new systems.

Correct Answer: B

QUESTION 2

A system administrator needs to review the installation status of the agent plug-ins that have been enabled for a specific computer. In which two places will the administrator find this information? (Select two.)

- A. the Policies view on the Symantec Management Console
- B. the Computer view on the Symantec Management Console
- C. the My Portal page on the Symantec Management Console
- D. the Software Delivery tab of the Symantec Management Agent
- E. the Jobs/Tasks tab on the Symantec Management Agent

Correct Answer: BD

QUESTION 3
