QUESTION 1

A System Manager is creating a production for a case. The production must produce all non-Excel file types in TIFF format and produce all Excel files in native format. All files should be named with a production number. How should this production be created?

- A. use a Mixed Mode production, with all non-Excel files in TIFF format, named with production numbers; use Metadata export for the Excel files and use option to include native copies
- B. produce all non-Excel files in TIFF format, named with production numbers; use Native Only export for the Excel files
- C. produce all non-Excel files in TIFF format, named with production numbers; produce all Excel files in Native Only format, named with production numbers
- D. use a Mixed Mode production, with Excel files produced natively and all other files produced in TIFF format; all files named with production numbers

Correct Answer: D

QUESTION 2

How does the Symantec Clearwell eDiscovery Platform 7.x assist in maintaining chain-of-custody through the Collections and Processing stages of the Electronic Discovery Reference Model (EDRM)?

- A. by indexing all source data
- B. by integrating with third-party processing applications and presenting a unified management interface for those tools
- C. by creating a hashed copy set in a preservation store for indexing
- D. by generating a list of file hashes for all documents before collecting them

Correct Answer: C
