- ⚙️ **365 Days** Free Update
- ⚙️ **800,000+** Satisfied Customers

QUESTION 1

Which are the two storage options for a Content Library when using the VMware vCenter Appliance? (Choose two.)

- A. FTP
- B. NFS
- C. CIFS
- D. VMFS

Correct Answer: BD

When you create a local library, you can store its contents on a datastore managed by the vCenter Server instance or on a remote file system. Depending on the type of storage that you have, you can use Virtual Machine File System (VMFS) or Network File System (NFS) for storing content on a datastore.

QUESTION 2

What are two requirements to enable EVC in a vSphere DRS cluster? (Choose two.)

- A. CPUs must be from the same vendor.
- B. CPUs must be in the same family and of the same speed.
- C. No VMs may be running in the cluster.
- D. EVC must use the lowest possible baseline supported by the hardware.

Correct Answer: AD

QUESTION 3

A vSphere HA cluster with four hosts has admission control configured to tolerate one host failure. Which statement is true if a fifth host is added?

- A. CPU and Memory capacity will be set to 25%.
- B. CPU and Memory capacity will be set to 50%.
- C. CPU and Memory capacity will be set to 20%.
- D. CPU and Memory capacity will be set to 30%.

Correct Answer: C

Select the Percentage of Cluster Resources Reserved admission control policy. This policy offers the most flexibility in terms of host and virtual machine sizing. When configuring this policy, choose a percentage for CPU and memory that reflects the number of host failures you want to support. For example, if you want vSphere HA to set aside resources for two host failures and have ten hosts of equal capacity in the cluster, then specify 20%

QUESTION 4

Which three design requirements must be satisfied to enable RAID-6 objects in a VMware vSAN cluster? (Choose three.)

- A. deduplication and compression
- B. at least six hosts contributing storage
- C. vSAN Advanced license or higher
- D. vSAN stretched cluster
- E. All Flash configuration

Correct Answer: BCE

QUESTION 5

Which component must be deployed before using encrypted virtual machines in a vSphere 6.5 environment?

- A. vCenter Server must use CA signed certificates
- B. a host with supported Trusted Platform Module
- C. supported password vault
- D. External Key Management Server

Correct Answer: D
