QUESTION 1

Once changes are introduced in a Rules Set, which option confirms the new rules set works properly with your data?

- A. Run the Rules Tester.
- B. Have users check manually.
- C. Check the Unhandled tokens.
- D. Run the job again and confirm results.

Correct Answer: D

QUESTION 2

When building a field level survivorship routine and the same business rule applies to all address columns, what is the most efficient way to do this?

- A. Move all of the address columns to the target field and define a single rule.
- B. You must use the complex survive expression identifying each address field.
- C. Because logic is being applied at the field level all fields need to have a rule defined.
- D. Apply the survivorship rule directly to the available columns and not to the target column.

Correct Answer: B

QUESTION 3

What two rule groups are needed for rule sets?

- A. A rule group for rules that you want to apply to split a domain.
- B. A rule group for rules that you want to apply to records after all other actions.
- C. A rule group for rules that you want to apply to records before all other actions.
- D. A rule group for rules that you want to apply to records as they read a lookup table.
- E. A rule group for rules that you want to apply copies of records before all other actions.

Correct Answer: CD

QUESTION 4

A match pass is running a very long time. What is the most common first thing you should review?

- A. The Frequency file.
- B. The blocking strategy.
- C. The number of passes.
- D. The hardware environment.

Correct Answer: C

QUESTION 5

When considering address certification versus address validation, which statement is true?

- A. The USAC module will fully parse as well as certify addresses.
- B. Both USAC and AVI modules will correct addresses when possible.
- C. Validation and certification are interchangeable terms. They each mean the same thing with regards to address processing.
- D. QualityStage address certification modules will only mark a record as certified. The AVI module must be used to validate and correct addresses.

Correct Answer: D
