**QUESTION 1**

Your network administrator asked you to replace Node I of an SRX5800 chassis cluster running in an active/active mode. The administrator wants to know any impact this could cause.

What should be considered during the hardware replacement?

- A. You would need to add a third RE to Node0 to handle the overload of traffic when Node I is taken offline.
- B. The two REs on Node0 might become overwhelmed when the third and fourth active REs are taken offline on Node1.
- C. Node0 might be disabled once it loses connectivity Node1.
- D. Some traffic might be impacted when the active interfaces transition from Node1 to Node0 and the sessions are reestablished.

Correct Answer: B

**QUESTION 2**

-- Exhibit -- Exhibit -

Click the Exhibit button.

A server in the DMZ of your company is under attack. The attacker is opening a large number of TCP connections to your server which causes resource utilization problems on the server. All of the connections from the attacker appear to be coming from a single IP address.

Referring to the exhibit, which Junos Screen option should you enable to limit the effects of the attack while allowing legitimate traffic?

- A. Apply the Junos Screen option limit-session source-based-ip to the Untrust security zone.
- B. Apply the Junos Screen option limit-session source-based-ip to the DMZ security zone.
- C. Apply the Junos Screen option limit-session destination-based-ip to the Untrust security zone.
- D. Apply the Junos Screen option limit-session destination-based-ip to the DMZ security zone.

Correct Answer: A

---

### QUESTION 3

Which statement is true about factory-default zones?

- A. High-end SRX devices have trust and untrust zones.
- B. Branch SRX devices have trust and untrust zones.
- C. High-end SRX devices have only a trust zone.
- D. Branch SRX devices have no zones.

Correct Answer: B

---

### QUESTION 4

You are configuring a blacklist for Web filtering on a branch SRX Series device.

Which two URL patterns are valid? (Choose two.)

- A. <http://www.company.com/>\*
- B. [http://\\*.company.com](http://*.company.com)
- C. [www.company.com](http://www.company.com)
- D. 1.2.3.4

Correct Answer: BD

---

### QUESTION 5

Which two statements are true about pool-based destination NAT? (Choose two.)

- A. It also supports PAT.
- B. PAT is not supported.
- C. It allows the use of an address pool.
- D. It requires you to configure an address in the junos-global zone.

Correct Answer: AC
