QUESTION 1

You have Site Recovery Manager (SRM) in place to protect critical vCloud servers in the event of a disaster. Over lunch, a manager asks you why SRM is configured to protect only the vCloud servers and not the actual department workload VMs. What do you tell her?

- A. The workload VMs are on fenced networks, which can't be failed over.
- B. SRM can't fail over the workload VMs, but it is a simple matter to restart them once the vCloud servers have failed over.
- C. Workload VM failover is implied when you failover the vCloud infrastructure servers.
- D. vCloud workloads can be migrated with vCloud Director once it has failed over and so are not required to be protected with SRM.

Correct Answer: C

QUESTION 2

Your manager wants a technical solution which will allow users access to the company's private cloud where the VMs they create are tightly controlled and the deployment process is streamlined. How would you advise your manager to solve this problem?

- A. Use vCenter Orchestrator to set up a deployment workflow
- B. Use vCloud Connector to move the VMs into the private cloud
- C. Use vCloud Automation Center to set up a deployment portal
- D. Use vCenter Operations Suite to deploy VMs

Correct Answer: C

QUESTION 3

Your manager heard on a webinar that vCenter Operations Manager has the ability to create custom groups so that he could better align performance and management decisions with the business. Which options represent custom groups you could create for your manager? (Choose two.)

- A. vCenter Datacenter
- B. Line of business
- C. Application

D. DRS/HA Cluster

Correct Answer: BC

QUESTION 4

The physical datacenter on which your current private cloud runs is nearing capacity. Which product would allow you to temporarily move some of the workload to a leased public cloud?

A. vCloud Connector

B. Distributed Resource Scheduler

C. vFabric Suite

D. Site Recovery Manager

Correct Answer: A

Reference: <http://www.vmware.com/products/site-recovery-manager/features.html>

QUESTION 5

Your manager wants to know why traditional usage metering tools are less effective in your private cloud. Which two statements are accurate responses? (Choose two.)

A. You want to improve the efficiency of your virtual environment.

B. Traditional monitoring tools won't work in a cloud environment.

C. Resource usage is shared in a virtual environment.

D. Traditional metering tools don't work in VMs.

Correct Answer: CD
