QUESTION 1

A network administrator has copied new software to an HP ProVision switch and placed this software in the secondary flash location. The switch is currently booting from the primary flash location. The administrator wants the switch to start using the new software.

What should the administrator do to accomplish this?

- A. Execute the command to boot the system from the secondary flash.
- B. Reboot the switch, which automatically causes the switch to use the newer software.
- C. Copy the secondary software to the primary software slot.
- D. Rename the secondary software as the primary software.

Correct Answer: A

QUESTION 2

Refer to the exhibit.

```
Provision# show vlans ports 1
```

```
Status and Counters - VLAN Information - for ports 1
```

VLAN ID	Name	Status	Voice	Jumbo
1	VLAN1	Port-based	No	No
10	VLAN10	Port-based	No	No
20	VLAN20	Port-based	No	No

A network administrator enters the command shown in the exhibit to check the VLANs on an HP ProVision switch interface. The administrator wants to discover which VLANs are tagged and untagged on the port. What can the administrator do to accomplish this?

- A. Enter the show vlans ports 1 command but add detail at the end of the command.
- B. View all VLANs on the switch by entering the show vlans command without a VLAN ID.
- C. View the physical interface by entering the show interface brief command.
- D. Enter the show interfaces all command.

Correct Answer: A

QUESTION 3

What does the traceroute command identify on an HP ProVision switch?

- A. each Layer 3 device between the switch and a destination
- B. the path to each router connected to the switch
- C. debug output tracing entries to the routing table
- D. each physical device between the switch and a destination

Correct Answer: B

QUESTION 4

A network administrator enters this command on an HP ProVision switch with IP routing enabled:

```
ip route 0.0.0.0/0 10.1.1.1 metric 10 distance 10
```

This is the only IP route to 0.0.0.0/0 on the switch. What is the effect?

- A. The switch uses this route for all traffic that does not match a specific route in its routing table.
- B. The switch uses this route for all traffic unless the traffic matches a route with a lower administrative distance than 10.
- C. The switch uses this route to route all traffic from 10.1.1.1.
- D. The switch uses this route for all traffic unless the traffic matches a route with a lower cost than 10.

Correct Answer: C

QUESTION 5

What is the purpose of a management VLAN on an HP Provision switch?

- A. To prevent IP addresses from being configured on any VLANs other than the management VLAN
- B. To provide an administrative-only marker, label, or alias for the VLAN where IMC is installed
- C. To identify a specific VLAN as the only VLAN from which users can connect to the switch management interface
- D. To limit remote access connections by specifying the IP addresses that can establish connections

Correct Answer: C
