QUESTION 1

Which previous versions are supported when upgrading directly to Veeam Backup and Replication version 7? (select three)

- A. 6.5
- B. 6.0
- C. 6.1
- D. 6.2
- E. 5.0

Correct Answer: ABE

QUESTION 2

Where is the Extract utility command line version for Linux located?

- A. All major Linux distributions include an Extract utility compatible with Veeam Backup and Replication backup files.
- B. %PROGRAMFILES%\Veeam\Backup and Replication\Backup
- C. It is available upon request - open a support case.
- D. There is no Linux version of the Extract utility.
- E. It is a separate download from <http://www.veeam.com/downloads>

Correct Answer: B

QUESTION 3

Which statement regarding Enterprise Manager is true?

- A. RESTful API is an optional feature.
- B. Only XML format is currently supported for RESTful API for resource representation.
- C. Users with Portal User role can access VMs from their restore scope in VMs and/or Files tab and generate reports as permitted by their settings.
- D. Restore scope can be customized if you have Enterprise Edition.
- E. Users with Restore Operator role can access VMs from their restore scope in VMs and/or Files tab, as well as reports for these VMs; they can also perform restore operations as permitted by their settings.

Correct Answer: A

QUESTION 4

How often can you schedule Veeam ONE Reporter to perform data collection? (select two)

- A. Every X minute(s)
- B. Every X second(s)
- C. Every X hour(s)
- D. Data collection can not be performed manually.
- E. Every X day(s)

Correct Answer: CE

QUESTION 5

Is it possible to use Change Block Tracking (CBT) with Hyper-V?

- A. No, for Hyper-V hosts a proprietary filtering mechanism is used.
- B. Yes, but only for gen 2 virtual machines using VHDX.
- C. Yes, Veeam Backup and Replication installs a file system filter driver on every host.
- D. Yes, Hyper-V has built-in Change Block Tracking just like vSphere has.

Correct Answer: C
