QUESTION 1

Which of these are valid Virtual Infrastructure Summary dashboards in Veeam ONE? (select two)

- A. Hyper-V Summary
- B. vSphere Summary
- C. Virtual Infrastructure Summary
- D. Virtual Machine Summary
- E. NFS Share Summary

Correct Answer: CD

QUESTION 2

What effect will changing the compressing settings for a backup job have?

- A. New compression settings are applied at the next run of the job. Previously created backup files are not affected.
- B. New compression settings are not applied until an active full backup has been performed. Previously created backup files are re-processed.
- C. New compression settings are applied at the next run of the job. Previously created backup files are re-processed.
- D. It is not possible to change compression level after first backup has been run.
- E. New compression settings are not applied until an active full backup has been performed. Previously created backup files are not affected.

Correct Answer: E

QUESTION 3

Which of these statements regarding Replica failover/failback are true?

- A. After committing failback, the failback protective snapshot that saves the pre-failback state of a VM replica is deleted.
- B. After committing failback, replication activities for the VM which you failed back are NOT resumed automatically.
- C. When you undo failover, the VM replica is reverted to its pre-failover state, powered off and all changes that have taken place since the VM replica was powered on are deleted.
- D. After undoing failover has completed, you will need to reconfigure the replica job before it will start again.
- E. It is only possible to failover one VM at a time.

Correct Answer: BD

QUESTION 4

What is the lowest interval you can schedule a backup job to run at?

- A. Continuously
- B. Daily
- C. Every minute
- D. Hourly
- E. Every 5 minutes

Correct Answer: B

QUESTION 5

Which statement regarding Enterprise Manager is true?

- A. RESTful API is an optional feature.
- B. Only XML format is currently supported for RESTful API for resource representation.
- C. Users with Portal User role can access VMs from their restore scope in VMs and/or Files tab and generate reports as permitted by their settings.
- D. Restore scope can be customized if you have Enterprise Edition.
- E. Users with Restore Operator role can access VMs from their restore scope in VMs and/or Files tab, as well as reports for these VMs; they can also perform restore operations as permitted by their settings.

Correct Answer: A
