QUESTION 1

Which document is designed to assist those involved in the sale, installation and support of Hitachi Enterprise storage systems to ensure proper installation planning?

- A. the HiFire Pre-installation Report
- B. the System Administration Guide
- C. the HiPlan Service Guide
- D. the System Assurance Document

Correct Answer: D

QUESTION 2

What is the purpose of the System Assurance Document?

- A. to ensure accurate and complete record of pre-installation data
- B. to guarantee that HDS equipment is insured during transportation
- C. to inform a channel partner that equipment is available for shipment
- D. to validate configuration changes for customers with a premium service contract

Correct Answer: A

QUESTION 3

You are installing a VSP with 2 DKCs. Which component makes up the interconnection for data paths?

- A. SVP
- B. DKA
- C. VSD
- D. ESW

Correct Answer: D

QUESTION 4

Which two statements regarding how users login to Storage Navigator 2 on a VSP are correct? (Choose two.)

- A. A user name can only be used by one user at a time.

- B. Multiple users can login using a different user name each.
- C. Multiple users can login using the same user name.
- D. A maximum of 4 users can login at the same time.

Correct Answer: AB

QUESTION 5

You have set Extended Round Robin in Hitachi Dynamic Link Manager (HDLM) running on a server with intensive sequential I/O profile. Which two benefits result from implementing this algorithm? (Choose two.)

- A. tracks preloaded to cache
- B. blocks held permanent in Read Cache
- C. no tracks preloading on the system
- D. efficient cache usage on the storage system

Correct Answer: AD

QUESTION 6

What are three micro-program types on the VSP? (Choose three.)

- A. DKC Main
- B. SCSI path
- C. DKU
- D. HDD
- E. SVC

Correct Answer: ACD

QUESTION 7

In which two situations would you use the VSP New Installation procedure at a customer site? (Choose two.)

- A. when adding another set of CHAs

- B. when adding a second DKC to an existing system
- C. when performing major changes in RAID structures, emulation and/or LDEV configuration
- D. if instructed to do so by the Hitachi Global Support

Correct Answer: CD

QUESTION 8

An application running on a Windows server connected to a Hitachi Enterprise storage system with two paths is generating mostly sequential I/O.

Which algorithm should be set in Hitachi Dynamic Link Manager (HDLM) on that server?

- A. Least Blocks
- B. Round Robin
- C. Sequential Blocks
- D. Extended Least I/Os

Correct Answer: D

QUESTION 9

A customer is using a Hitachi Enterprise storage system with clustered servers in an active/passive relationship.

What must be done in Hitachi Dynamic Link Manager (HDLM) to ensure that the status of inactive paths on both passive and active nodes is monitored regularly?

- A. Switch on Auto Failback.
- B. Switch on Path Health Check.
- C. Set the reservation level to 2.
- D. Set up Intermittent Error Monitoring.

Correct Answer: B

QUESTION 10

You want to create a list of ports and WWNs for a newly installed VSP. No LUNs have been mapped on the VSP. What should you use to obtain this information?

- A. raidscan -p
- B. raidcom get port
- C. HORCM port info
- D. auport get info

Correct Answer: B

QUESTION 11

A customer is planning to deploy the Hitachi Command Suite (HCS) in an existing production environment that includes several VSP systems. What are two advantages of Hitachi Device Manager over Storage Navigator? (Choose two.)

- A. availability of the Host Data Collector
- B. ability to upgrade microcode non-disruptively
- C. ability to provision multiple VSP systems at the same time
- D. possibility of performing maintenance on multiple VSPs at the same time

Correct Answer: AC

QUESTION 12

Which CLI command can be used to add an LDEV on a VSP?

- A. ldev create device
- B. raidcom add ldev
- C. comraid add device
- D. raidcom initialize ldev

Correct Answer: B

QUESTION 13

What are two benefits of using Hitachi Dynamic Provisioning (HDP)? (Choose two.)

- A. HDP improves performance by dynamically balancing I/Os across CLPRs.

- B. HDP improves performance by spreading host I/O patterns across many physical disks.
- C. HDP places cache memory in a central pool available only to dynamically provisioned volumes.
- D. HDP allows for dynamically adding more physical storage to the volume when an application requires extra capacity.

Correct Answer: BD

QUESTION 14

The last path to a LUN fails.

What is the status of this path in Hitachi Dynamic Link Manager (HDLM)?

- A. Online (F)
- B. Online (E)
- C. Offline (C)
- D. Offline (E)

Correct Answer: B

QUESTION 15

You are installing a new VSP into your customer's SAN environment. How are the Fibre Channel topology settings adjusted?

- A. using the SVP "Maintenance" screen
- B. using the Storage Navigator "Port" screen
- C. using the jumper block on the VSP Channel Adapter
- D. automatically by the SVP

Correct Answer: B
