QUESTION 1

When using XSLT, if expected items are missing in the output, what is the MOST likely cause?

- A. The XPath expression in the select part of the tab is not formed properly.
- B. The XSLT processor is not properly configured.
- C. The XML parser is not passing the entire XSLT style sheet to the XSLT processor.
- D. The wrong XSLT style sheet is being used.

Correct Answer: A

QUESTION 2

What mechanism would an XML developer use to write the output of an XSLT processor to multiple files?

- A. Document("xml.doc")
- B. Save("xml.doc")
- C. Write("xml.doc")
- D. Output("xml.doc") E -THE developer will have to use an extension mechanism, since it is not supported by XSLT1.0

Correct Answer:

QUESTION 3

Which of the following are TRUE about XML Schema datatypes?

- A. A new type can be derived by extending multiple base types.
- B. A new complex types content model includes the base type's content model.
- C. Derivation of a complex type by extension is much like inheritance in an O-O language.
- D. anyType is the default datatype for an element if no type is specified.
- E. Datatypes that are derived by extension can add and remove attributes.

Correct Answer: BCD

QUESTION 4

Which of the following statements concerning the use of elements and attributes in an XML document is TRUE?

- A. The use of attributes will allow for pattern matching of the content when a DTD is used with the XML document.

- B. The use of an XML Schema will allow for the use of datatypes to control the content of the attributes.
- C. Both elements and attributes may be declared and controlled as complex types when the document is used in conjunction with an XML Schema.
- D- When using DTDs, elements should be used for critical values, since attributes cannot be validated.

Correct Answer: B

QUESTION 5

An application uses a large XML document that contains information about 10,000 customers. The application is performing poorly, with slow responses to requests for customers with a particular hobby. Which combination of the following could an XML developer use to facilitate logic for alleviating the problem?

- A. Create XML documents for each of the hobbies.
- B. Store IDs in a "hobbies" database table.
- C. Use IDs in each of the elements.
- D. Use IDREFs in each of the elements to reference the associated hobbies.

Correct Answer: CD
