**QUESTION 1**

A company establishes a BPM Governance Model with an Executive Review Committee and a BPM Project Review Committee. Once the project is initiated it is built out with resources from the Center of Excellence (COE) that design and develop the solution. In the course of working with the BPM Platform and SOA team, the program manager realizes that the project integration costs are greatly increased over the amount of the initial estimate. What should the program manager do?

- A. Press the SOA team to reduce their estimates.
- B. Negotiate a cheaper integration approach with the Executive Steering Committee.
- C. Present the cost over-run to the COE so that additional funds can be allocated.
- D. Present the cost over-run to the BPM Project Review Committee so that the integrations can be prioritized and placed into at development phase.

Correct Answer: D

QUESTION 2

A novice BPM analyst is capturing user stories for a company's marketing campaign process. Which best practice should the program manager recommend to the BPM analyst?

- A. Create a series of wire frame models.
- B. Have the developers write user stories.
- C. Capture use cases only if they are simple.
- D. Focus on participants, their actions and sequence of activities.

Correct Answer: D

QUESTION 3

One week prior to the start of Iteration 5, which is planned for a two week duration, the BPM Program Manager has asked developers to review the proposed user stories assigned to the iteration, define implementation tasks and provide estimates in hours. During the commitment meeting prior to iteration start, one of the user stories has a single implementation task with an estimate of 80 hours. What should the BPM Program Manager recommend?

- A. Break down the user story into child stories because it is an epic.
- B. Break down the implementation work into tasks that can be described in 8 hours or less.
- C. Pad the task with 20% more hours because developers typically under-estimate their required effort.
- D. Cancel the user story and move it to a future iteration because 80 hours too large to fit into a two-week iteration with confidence.

Correct Answer: B

**QUESTION 4**

A one day workshop has been completed, producing an inventory of 2 top-level business processes, 10 lower-level business processes, and 4 integrations. Which categorization of complexity is appropriate and which estimation method should be used in this scenario?

- A. Small, Rough Order of Magnitude (ROM)
- B. Small, Budgetary Estimate
- C. High, Rough Order of Magnitude (ROM)
- D. High, Budgetary Estimate

Correct Answer: C

QUESTION 5

The BPM program manager and process owner for a new hire onboarding process project need to ensure that the solution developed by the team will be accepted and adopted by the target users. To facilitate this, they decide to:

- A. plan additional playbacks for user screens.
- B. agree with users to postpone the release until every feature is correct.
- C. involve champion SMEs in the discovery and implementation including playbacks.
- D. insist on documentation of all user requirements before having the development team begin work.

Correct Answer: C
