- A. Generic servers
- B. Managed Web servers
- C. Unmanaged Web server
- D. JMS Servers

Correct Answer: C

---

**QUESTION 2**

A system administrator federated a custom profile to the deployment manager. The system administrator then created a new server (server1) on the federated node. How should the system administrator verify that the server was successfully created?

- A. Use the snoop servlet
- B. Run the installation Verification program
- C. View the addNode.log file of the node agent.
- D. View SystemOut.log file of the deployment manager.

Correct Answer: D

---

**QUESTION 3**

A system administrator installed the WebSphere Application Server V6 Network Deployment product.

The system administrator also created Application Server profile to deploy a J2EE application that is using Message Driven Beans (MDB). The system administrator did not install sample

applications during or after the installation.

What does the system administrator have to do to display and run the application successfully?

- A. Create a customer profile and deploy the application on it.
- B. Create and configure Service Integration Bus (SIB) and add the Server to it to create a messaging engine
- C. Install Embedded Messaging from the installation CD to create a messaging engine.

D. Install WebSphere MQ and deploy the application on it

Correct Answer: B

---

#### QUESTION 4

In considering security requirements for an Application Server, a system administrator is interested in implementing Java 2 security. Which of the following statements is valid regarding the enabling of Java 2 security?

- A. Global security must be enabled for Java2 security to function
- B. Global security does not need to be enabled for J2EE security to function
- C. Java2 security does not require Global security to be enabled
- D. Java2 security must be enabled for Global security to function

Correct Answer: C

---

#### QUESTION 5

Which of the follow statements MOST accurately describes the effect of increasing the JVM heap size?

- A. More objects will be created and the time required to garbage collect will decrease.
- B. Applications run longer before a garbage collection occurs.
- C. A larger heap size will cause the server to take loner to start.
- D. No measurable performance change will result from increasing the heap size.

Correct Answer: B
