QUESTION 1

Which type of state transition completion will trigger a save process on the record at runtime?

A. A transition that links back to itself.

B. A transition that links to another state.

C. Any transition will trigger a save process.

D. Any transition that contains an action called triSave or triSaveAndClose.

Correct Answer: C

QUESTION 2

Which statement is true about source mapping?

A. It is used only when mapping a smart section or locator field.

B. It is used only when the source object is the object of the start task.

C. It is used only when the source and target objects are the same type.

D. It is used only when there is a temporary association between the objects.

Correct Answer: A

QUESTION 3

An editable report has been created with the name triPeople - triRetired - Editable. The report designer wants to allow the user to be able to unretire multiple records. The designer has properly set the query to be editable and has selected the proper state. When the designer goes to the query\\'s Advanced tab to set the actions that will be available to the user, he finds that option is not available. What could be the problem?

A. The report has been created from the My Reports Tab.

B. There are no editable fields in the triRetired state so no actions are allowed.

C. The query is of type Report. Queries of type Report cannot be made editable.

D. The record is not editable for that state so no actions are available from the editable query.

Correct Answer: A

QUESTION 4

A state transition is not supposed to be available as a clickable action in a form at runtime but it appears anyway. Why?

A. The state transition is not configured to be excluded in the Sub Action properties.

B. The Hidden Action property is not configured correctly in the State Transition properties.

C. The Default Display property is not configured to be excluded in the Sub Action properties.

D. The Secondary Action property is not configured correctly in the State Transition properties.

Correct Answer: A

QUESTION 5

Multiple DataConnect jobs were supposed to start but have not. What should be checked to make sure the DataConnect process is running?

A. DataConnect

B. Agent Manager

C. Database Manager

D. Database Query Tool

Correct Answer: B
