Correct Answer: CE

---

**QUESTION 4**

When using a single BIG-IP with APM, an organization can support up to 60,000 concurrent remote access users.

A. True

B. False

Correct Answer: A

---

**QUESTION 5**

It is common for free storage space to exist somewhere in a business network that is not easy for storage administrators to utilize. What solution can the ARX provide in this situation?

A. The ARX identifies the exact location of the free storage, which allows network administrators to target those locations when provisioning additional storage.

B. The ARX extends the capacity of each server by 10-15, through intelligent file virtualization.

C. The ARX uses the extra storage for transaction logs and index files.

D. The ARX allows the customer to pool storage from anywhere within the enterprise and capacity balance the overflow across devices.

Correct Answer: D

---
