QUESTION 2

You are about to add an IPv6 address to an interface with CLISH, but the system generates a message stating that the command is unknown. What could be the reason of this behavior?

- A. You have to install the IPv6 SKU license onto your Security Gateway
- B. You must activate the IPv6 protocol stack with the "set ipv6-state on" command in CLISH
- C. You have to tick the IPv6 check box under the topology section of your gateway object within SmartConsole
- D. You have to install the IPv6 SKU license onto your Security Management Server

Correct Answer: B

QUESTION 3

Which of the following inputs is suitable for debugging HTTPS inspection issues?

- A. `vpn debug cptls on`
- B. `fw ctl debug -m fw + conn drop cptls`
- C. `fw diag debug tls enable`
- D. `fw debug tls on TDERROR_ALL_ALL=5`

Correct Answer: B
