QUESTION 2

Your company enforces a strict change control policy. Which of the following would be MOST effective for quickly dropping an attacker's specific active connection?

- A. Change the Rule Base and install the Policy to all Security Gateways
- B. Block Intruder feature of SmartView Tracker
- C. Intrusion Detection System (IDS) Policy install
- D. SAM ?Suspicious Activity Rules feature of SmartView Monitor

Correct Answer: B

QUESTION 3

In what way are SSL VPN and IPSec VPN different?

- A. SSL VPN is using HTTPS in addition to IKE, whereas IPSec VPN is clientless
- B. SSL VPN adds an extra VPN header to the packet, IPSec VPN does not
- C. IPSec VPN does not support two factor authentication, SSL VPN does support this
- D. IPSec VPN uses an additional virtual adapter, SSL VPN uses the client network adapter only

Correct Answer: D

QUESTION 4

Which message indicates IKE Phase 2 has completed successfully?

- A. Quick Mode Complete
- B. Aggressive Mode Complete
- C. Main Mode Complete
- D. IKE Mode Complete

Correct Answer: A

QUESTION 5

You are going to upgrade from R77 to R80. Before the upgrade, you want to back up the system so that, if there are any problems, you can easily restore to the old version with all configuration and management files intact. What is the BEST backup method in this scenario?

- A. backup
- B. Database Revision
- C. snapshot
- D. migrate export

Correct Answer: C

Snapshot Management The snapshot creates a binary image of the entire root (lv_current) disk partition. This includes Check Point products, configuration, and operating system. Starting in R77.10, exporting an image from one machine and importing that image on another machine of the same type is supported. The log partition is not included in the snapshot. Therefore, any locally stored FireWall logs will not be saved. Reference:
