QUESTION 1

Given the two security constraints in a deployment descriptor:

101.

102.

103. SALES 110.

If the two security constraints have the same url-pattern and http-method, which two, inserted independently at line 109, will allow users with role names of either SALES or MARKETING to access this resource? (Choose two.)

- A.
- B. *
- C. ANY
- D. MARKETING

Correct Answer: BD

QUESTION 2

Which security mechanism uses the concept of a realm?

- A. authorization
- B. data integrity
- C. confidentiality
- D. authentication

Correct Answer: D

QUESTION 3

Assume that a news tag library contains the tags lookup and item:

lookup Retrieves the latest news headlines and executes the tag body once for each headline. Exposes a NESTED page-scoped attribute called headline of type com.example.Headline containing details for that headline.

item Outputs the HTML for a single news headline. Accepts an attribute info of type com.example.Headline containing details for the headline to be rendered.Which snippet of JSP code returns the latest news headlines in an HTML table, one per row?

- A.

B.

C.

D.

Correct Answer: C

QUESTION 4

In a JSP-centric shopping cart application, you need to move a client's home address of the Customer object into the shipping address of the Order object. The address data is stored in a value object class called Address with properties for: street address, city, province, country, and postal code. Which two JSP code snippets can be used to accomplish this goal? (Choose two.)

A.

B.

C.

D.

E.

F.

Correct Answer: BE

QUESTION 5

You are designing an n-tier Java EE application. You have already decided that some of your JSPs will need to get data from a Customer entity bean. You are trying to decide whether to use a Customer stub object or a Transfer Object. Which two statements are true? (Choose two.)

A. The stub will increase network traffic.

B. The Transfer Object will decrease data staleness.

C. The stub will increase the logic necessary in the JSPs.

D. In both cases, the JSPs can use EL expressions to get data.

E. Only the Transfer Object will need to use a Business Delegate.

F. Using the stub approach allows you to design the application without using a Service Locator.

Correct Answer: AD
