QUESTION 1

A JAXR client has established connection with a UDDI registry and needs to get a service binding from the registry. What is required to accomplish this task?

- A. find the appropriate concept and then find the service binding associated with that concept
- B. find the appropriate authentication token and then find the service binding associated with that authentication token
- C. find the appropriate organization, get the tModel associated with that organization, and then find the service binding associated with the tModel
- D. find the appropriate organization, find the services associated with that organization, and then find the service binding associated with the service

Correct Answer: D

QUESTION 2

Which two statements are true about JAXR support for XML registries? (Choose two.)

- A. The CapabilityProfile tells a client the capability level of a registry.
- B. UDDI registries must support ebXML to be compatible with JAXR.
- C. The UnsupportedCapabilityException is processed for errors from non-Java providers.
- D. The JAXR API declares methods as level 0 or level 1.
- E. JAXR registry clients present an XML schema that defines the infomodel for the provider.

Correct Answer: AD

QUESTION 3

Which two statements are true about the role of XML schemas in Web services? (Choose two.)

- A. DTDs provide stricter data typing than XML schemas.
- B. XML schemas can be used to validate the organization of XML documents.
- C. XML schemas contain a vocabulary, content model and data types.
- D. DTDs are easier to map to Java than XML schemas, and so remain more popular.
- E. The W3C recommends that XML schemas be referred to as XSD.
- F. The W3C has designated that XML schemas be referred to as WXS.

Correct Answer: BC

QUESTION 4

A Java EE 5 application contains business logic composed of EJB3 beans. All current clients are Java applications accessing the business logic using RMI. Some clients are remote (running in different JVMs) and some are local (running in the same JVM). Which two occur if EJB components are exposed as Web services? (Choose two.)

- A. New applications can use published interfaces to access existing applications.
- B. Current local clients must access the Web services in the application as an URL.
- C. WSDL documents define common types for all clients.
- D. Current remote clients must switch from RMI to Web service access.
- E. Delivery of messages is guaranteed for local clients.

Correct Answer: AC

QUESTION 5

An automobile manufacturer publishes a Web service for use by their suppliers. The manufacturer has stringent security requirements that require suppliers to verify their identity. Data integrity and confidentiality must be maintained between the client and the server. Which two meet all of these requirements? (Choose two.)

- A. X.509 and XKMS
- B. XACML and XKMS
- C. SSL and mutual authentication
- D. XML Encryption and XML Digital Signature
- E. Private network and XML Signature

Correct Answer: CD
