QUESTION 1

The physical datacenter on which a company's private cloud runs is nearing capacity. Which option would allow the company to temporarily move some of its workloads to a leased public cloud?

- A. vRealize Operations
- B. Site Recovery Manager
- C. vFabric Suite
- D. vCloud connector

Correct Answer: C

QUESTION 2

An administrator is designing a multi-tier application, where one virtual machine will be located in the private cloud and the other in VMware's vCloud air environment. Which feature will allow the administrator to address the variable latency and limited bandwidth concerns of routing traffic across the Internet?

- A. Dedicated Cloud
- B. Backend as a Service
- C. Direct Connect
- D. Horizon Air

Correct Answer: B

QUESTION 3

A manager wants to know why traditional usage metering tools are less effective in a private cloud environment than they are in physical environments. What statement provides the best response?

- A. Traditional monitoring tools won't work in a cloud environment.
- B. Traditional metering tools require agents to be installed, which don't work in virtual machines.
- C. Resource usage is based on the overall demand of all virtual machines instead of per server.
- D. This is not true, traditional usage metering tools are still the best choice.

Correct Answer: B

QUESTION 4

A manager is concerned that creating hundreds of identical virtual machines is needlessly taking up too much storage

apace. Which vRealize Automation feature will help avoid this issue?

- A. Storage DRS
- B. Snapshots
- C. Templates
- D. Linked Clones

Correct Answer: C

QUESTION 5

A manager asks an administrator if it's possible to know when infrastructure components in the cloud will run out of capacity. Which vRealize Operations Super Metric badge would allow the manager to see the remaining capacity and time to exceed capacity for these components?

- A. Risk
- B. Health
- C. Performance
- D. Efficiency

Correct Answer: B
