QUESTION 1

In an environment which requires secure user access, a Citrix Administrator configures Authentication,

Authorization and Auditing (AAA) to redirect a user to the logon page.

Which four steps are required to complete the authentication process? (Choose four.)

- A. Configure a syslog server to capture invalid logon attempts?
- B. Verify that the user is authorized to access specific intranet content
- C. Collect the user\\'s credentials to cache them in a directory that is accessible through LDAP
- D. Log the user accesses, including invalid login attempts, in an audit log
- E. Create a load-balancing virtual server to redirect for secure access
- F. Maintain a session timeout, after which users must authenticate again to regain access to the intranet
- G. Apply specified two-factor authentication method

Correct Answer: CEFG

QUESTION 2

Scenario: A Citrix Administrator has a Citrix ADC SDX with four VPX instances configured. The SDX has a 10GB bandwidth license that has been configured with dedicated bandwidth of 2 GB for each instance. However, the administrator found that three instances do NOT ever reach the bandwidth limit, while one instance reaches the limit and needs 1 GB more bandwidth to accommodate increased traffic requests. What can the administrator change on the instance that requires more bandwidth, to meet traffic requirements?

- A. Configure LA channel to increase the bandwidth
- B. Configure burst capacity of 1 GB with priority 10
- C. Purchase a SDX license to increase the bandwidth on the instances
- D. Configure burst capacity on the instance adding 1 GB of bandwidth with burst priority 0

Correct Answer: D

QUESTION 3

A NetScaler with Unified Gateway combines _____ and ____ to provide access to websites and applications through a single URL. (Choose the correct option to complete the sentence.)

- A. NetScaler Gateway; Load Balancing
- B. Content Switching; Authentication features

https://www.pass2lead.com/1y0-230.html

2024 Latest pass2lead 1Y0-230 PDF and VCE dumps Download

C. Content Switching; NetScaler Gateway

D. Authentication features; Load Balancing

Correct Answer: B

Explanation: NetScaler Unified Gateway leverages its Authentication, Authorization and Auditing (AAA) features with content switching to enable users to access all their authorized enterprise applications through a single gateway and URL.
