QUESTION 1

CORRECT TEXT

Scenario: Provisioning Services has been installed to facilitate the deployment of Windows 8 desktops and web servers. A Citrix Engineer is instructed to provision web servers using the Web_Server vDisk. The engineer needs to create a target device and add the device to Active Directory.
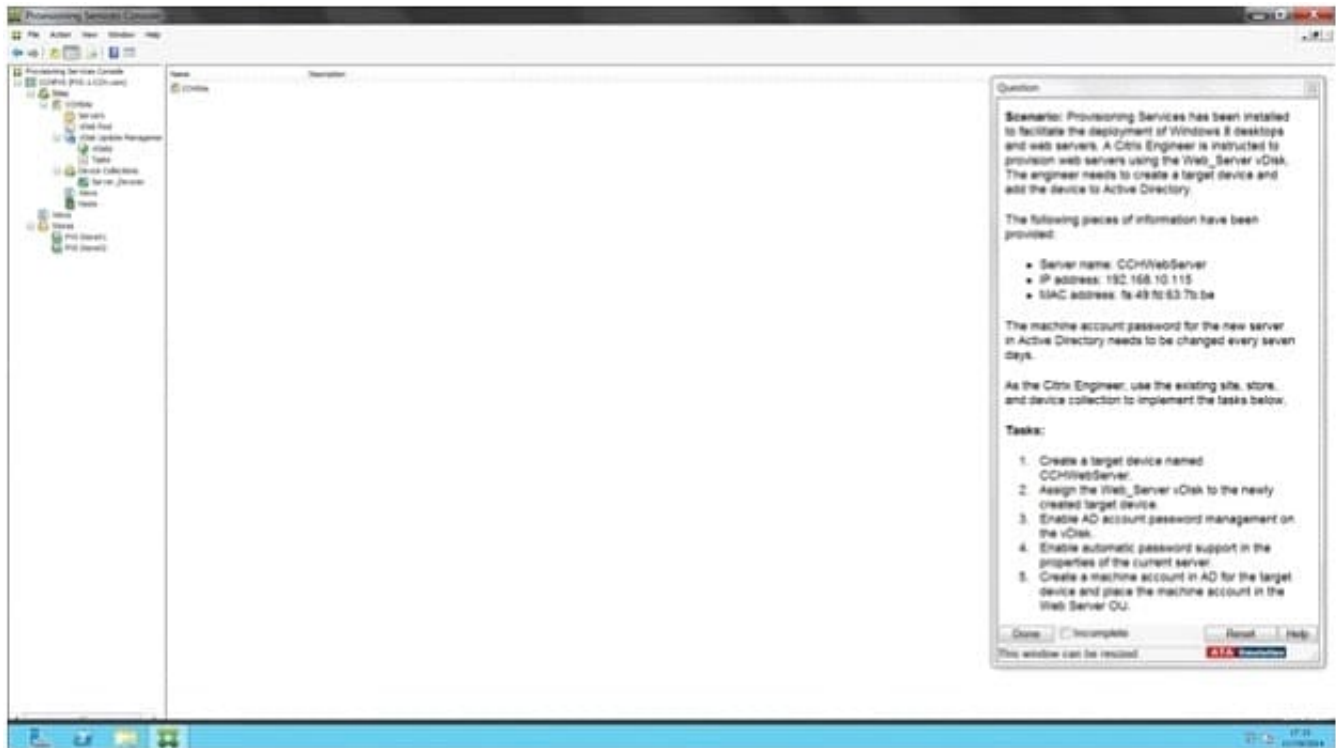

The following pieces of information have been provided:

Server name: CCHWebServer IP address: 192.168.10.115 MAC address: fa:49:fd:63:7b:be

The machine account password for the new server in Active Directory needs to be changed every seven days. As the Citrix Engineer, use the existing site, store, and device collection to implement the tasks below.

Tasks:

1.

 Create a target device named CCHWebServer.

2.

 Assign the Web_Server vDisk to the newly created target device.

3.

 Enable AD account password management on the vDisk.

4.

 Enable automatic password support in the properties of the current server.

5.

 Create a machine account in AD for the target device and place the machine account in the Web Server OU.

A.

Correct Answer: A Section: (none)

Answer: Find the solution with all steps below.

The wizard is run directly from a Provisioning Services Console. Right-click on the Site icon in the Console

tree panel, then select the Streamed VM Setup Wizard... menu option. The Welcome to the Streamed VM

Setup Wizard appears.

Click Next to begin the setup.

Select the type of hypervisor (Xenserver per the Simulation) to connect to, then enter the required

connection credentials.

![Pass2Lead logo](https://Pass2Lead.com)
The hypervisor information for the environment is:

- XenServer IP Address: 192.168.10.5
- Username: root
- Password: Password1

Click Next to verify the connection. Note: For convenient reuse, the most recently used hypervisor and username will be cached in the registry of the local machine running this instance of the Console. Note: XenServer 5.5 Update 2 hypervisors are not supported in the 5.6.1 Streamed VM Setup Wizard. System Center Virtual Machine Management (SCVMM) servers require PowerShell 2.0 to be installed. Optional. On the Hypervisor cluster screen, select the hypervisor host or cluster to host the VMs, then click Next. Select one VM template from the specified host, then click Next. On the Collection and vDisk page, select the collection in which to add VMs. Select a single shared vDisk within to assign to VMs within that collection, then click Next. Web_Server vDisk uk.co.certification.simulator.questionpool.PList@1669be70

Set the number of VMs to create, the number of vCPUs, and the amount of Memory each new virtual machine will use. 1 VM per the Simulation- CCHWebServer Enable the radio button next to one of the following methods used for adding Active Directory computer accounts, then click Next: Note: An Active Directory administrator will need to delegate rights to the Provisioning Services Console user to allow Active Directory account creation. Note: The domain and OU default to those of the current user. Note: New computer names to be created are first validated that they do not already exist as computers in Active Directory, VMs, or target devices. If the Create new accounts method is selected: Use ?Web Server OU uk.co.certification.simulator.questionpool.PList@16970c10 Review all configuration settings, and then click Next to confirm and finish configurations. Note: Clicking Cancel cancels the configuration of any additional machines, and the quantity of successfully configured machines displays under the Progress bar. If the wizard fails or is cancelled in the middle of an operation, any progress made is retained. If cleanup of existing progress is required, it must be done manually, which includes removing the following: uk.co.certification.simulator.questionpool.PList@16970da0

QUESTION 2

Which two options are required to create a Windows 7 virtual machine using the XenDesktop Setup Wizard in the Provisioning Services Console? (Choose two.)

A. A vDisk in Private mode

B. Virtual machine template

C. Windows 7 master image

D. An existing machine catalog

E. XenDesktop Controller address

Correct Answer: BE Section: (none)

QUESTION 3

Which policy option allows for advanced printer options for large industrial printers while keeping drivers to a minimum and accounting for multiple printer models in use?

A. Use only printer model specific drivers.

B. Use automatic installation of in-box printer drivers.

![Pass2Lead](https://Pass2Lead.com)
C. Use universal printing only if requested driver is unavailable.

D. Change the universal driver preference to PCL5c, EMF, XPS.

Correct Answer: C Section: (none)

QUESTION 4

How can a Citrix Engineer ensure that external users connect only to specific desktops through a NetScaler Gateway?

A. Create a session policy assigned to users.

B. Create a StoreFront VIP on NetScaler Gateway.

C. Create an access policy assigned to a Delivery Group.

D. Create a StoreFront filter to show only authorized desktops

Correct Answer: C Section: (none)

QUESTION 5

Which feature should a Citrix Engineer implement to ensure that client devices do NOT connect directly to back-end components?

A. ICA Proxy

B. StoreFront

C. URL Rewrite

D. Secure Ticket Authority (STA)

Correct Answer: A Section: (none)
