QUESTION 4

You have use case requiring the design of a synchronous OIC integration flow that will return a custom business fault message to the client if processing files due to an external runtime fault encountered during the integration instance execution

- A. Implement a scope fault handler to catch the runtime fault, and then use the Fault Return action providing mapped data for the custom fault.
- B. Implement the Global fault handler to catch the runtime fault, and then use the Re-Throw fault action to send the custom fault to the client
- C. Create a custom scope fault handler to catch the runtime fault, and then use the Re-Throw fault action to send the fault to the error hospital
- D. Implement a scope fault handler to catch the runtime fault, then allow the Global fault handler to automatically send the runtime fault to the error hospital

Correct Answer: A
