**QUESTION 1**

You need to display a message to a logged in shopper about a relevant promotion, based on the number of products in the cart and the total value of the items. You develop a custom widget that uses the User, Cart and Site view models as displayed in this example Javascript:

```
function (ko) {  
    ...  
    widget.showCartMsg = ko.computed(function() {  
        return (widget.user().loggedIn() &&  
            widget.cart().numberOfItems() > 0 &&  
            widget.cart().subTotal() < minSpend);  
    });  
    widget.cartMsg = ko.computed(function() {  
        return widget.translate('cartMsg',  
            {currencySymbol: widget.site().currency.symbol,  
            cartTotal: widget.cart().subTotal(), minSpend: minSpend,  
            coupon: coupon});  
    });  
    ...  
}
```

Under what condition is the showCartMsg() function true?

- A. Only when there is at least one item in the cart and the cart subtotal is less than the value of minSpend
- B. When a user is logged in and there is at least one item in the cart and the cart subtotal is less than the value of minSpend
- C. If either a user is logged in or there is at least one item in the cart or the cart subtotal is less than the value of minSpend
- D. As long as the user is logged in; the status of the cart does not matter

Correct Answer: C

QUESTION 2

Given the example custom widget Javascript:

```
widget.cartMsg = ko.computed(function() {  
    return widget.translate('cartMsg',  
        {currencySymbol: widget.site().currency.symbol,  
        cartTotal: widget.cart().subTotal(), minSpend: minSpend,  
        coupon: coupon});  
});
```

In order to employ the Cart view model, what should the custom widget's widget.json descriptor contain for the imports attribute?

- A. The imports attribute should contain the value "user" because the cart view model belongs to the user
- B. The imports attribute is only valid for global widgets and is not relevant
- C. The imports attribute can be empty because the Cart view model is global
- D. The imports attribute should contain the value "cart"

Correct Answer: B

QUESTION 3

Which is NOT a step involved in creating widget configuration settings?

- A. Define the configuration settings string resources for all supported locales
- B. Update widget template and JavaScript code to use the configuration parameters as required
- C. Define the configuration settings in a config.json file
- D. Compile the configurations before the widget extension is uploaded
- E. Add the widget configuration settings folders and files to the widget extension structure

Correct Answer: D

QUESTION 4

What are two use cases for fragmenting widgets into elements? (Choose two.)

- A. Reduce the page load times and improve performance
- B. Allow greater control over the position of widget functionally on the storefront
- C. Improve reusability and extensibility of widget code
- D. Separate the HTML display template and JavaScript files

Correct Answer: AB

QUESTION 5

Given this widget JavaScript snippet using the CCRestClient library:

```
ccRestClient.request("getProduct",  
    null,  
    successFunction(widget),  
    errorFunction(widget),  
    "xprod2119"  
);
```

What is the URL of the created request to Commerce Cloud?

- A. GET /ccstore/v1/products
- B. GET /ccstore/v1/products/xprod2119
- C. POST /ccstore/v1/products
- D. PUT /ccstore/v1/products/xprod2119
- E. GET/ccstore/v1/products?getProduct=xprod2119

Correct Answer: A
