QUESTION 1

Which three are the main goals of Oracle Identity Security Operations Center (SOC) Framework? (Choose three.)

- A. fast and easy deployment of on-premises services through a centralized console
- B. a single pane of glass to manage security threats across their on-premises and cloud environments
- C. the ability to monitor heterogeneous environments
- D. a suite of integrated solutions that work together, and not have to manage multiple solutions
- E. the ability to integrate different services through open standards

Correct Answer: ABD

QUESTION 2

In your organization, security operations complains about the shortage of resources to handle the number of alerts generated from the security products deployed. You want to automate the process of handling and remediating the alerts and also want to add contextual awareness to adapt to the threats in real time.

Which would provide the required solution?

- A. Oracle Integration Cloud Service
- B. Oracle Identity Security Operations Center (SOC)
- C. Oracle Configuration and Compliance Cloud Service
- D. Oracle Log Analytics Cloud Service

Correct Answer: B

QUESTION 3

Your company is in the banking industry and offers financial services to the public online. You just became aware of a Phishing attack on your customers. This attack prompts your clients to log into fake websites with their password. As the system administrator, what can you turn on with Oracle Security Monitoring and Analytics Cloud Service that could help protect your clients?

- A. Lock all user accounts
- B. Send out notifications to clients to change their password.
- C. Turn on multi factor authentication
- D. Disable online access

Correct Answer: B

QUESTION 4

Which feature do you activate in Oracle Identity Cloud Service so that users can use their Microsoft Active Directory passwords to sign in to access resources that are protected by Oracle Identity Cloud Service?

- A. The Import utility
- B. The bridge
- C. Identity Provider
- D. Delegated Authentication

Correct Answer: D

QUESTION 5

Which two are the main differentiators of Oracle Identity Cloud Service NOT supported by first- generation Identity-as-a-Service (IDaaS) vendors? (Choose two.)

- A. It implements OAuth by default for easy integration with Oracle CASB Cloud Service and Oracle Security Monitoring and Analytics Cloud Service.
- B. It provides the ability to manage the life cycle of identities on hybrid environments.
- C. It provides support for multiple Software-as-a-Service (SaaS) vendors.
- D. It provides support for Open Standard.

Correct Answer: AD
