### QUESTION 1

In the Cloud Order Management system, identify the function performed by the External Interface Layer.

- A. It manages the communication between Order Management and external or internal fulfillment systems.
- B. It sends information to downstream fulfillment systems, and interprets responses and updates from those systems.
- C. It receives information from upstream order capture systems, sends information to downstream fulfillment systems, and interprets responses and updates from those systems.
- D. It imports orders and processes them to fulfillment lines before assigning them to fulfillment systems.

Correct Answer: B

---

### QUESTION 2

What are the three future types of supply planned orders that GOP can consider? (Choose three.)

- A. Transfer Planned Orders
- B. Buy Planned Orders
- C. Scrap Planned Orders
- D. Rework Planned Orders
- E. Make Planned Order

Correct Answer: ABE

Future supply can include the supply that results from planned orders of three types: make, buy, or transfer.

---

### QUESTION 3

Your company is a manufacturer and distributor of CTO type of products globally, and uses Global Order Promising to promise its orders. You recently noticed that the promising results are determining the expected sources globally but not the least-cost ones. You want to understand the logic used by the GOP engine to derive the least-cost source.

Identify the four cost elements used by the cloud Global Order Promising engine to achieve the Profitable-to-Promise objective? (Choose four.)

- A. Cost of internal transfers between organizations
- B. Storage Cost (when the cost of holding that item in inventory is high)
- C. Overhead Cost
- D. Resource Consumption Cost (in case the end item is to be manufactured)

- E. Component Cost
- F. Standard Cost at internal organizations

Correct Answer: ADEF

---

#### QUESTION 4

A company manufactures and ships industrial water filters from its only factory unit in India.

Which four types of lead time can the company use to create promising rules in lead-time promising mode?

(Choose four.)

- A. total lead time
- B. processing lead time
- C. supplier lead time
- D. transit lead time
- E. cumulative total lead time
- F. cumulative manufacturing lead time
- G. user-defined lead time

Correct Answer: AEFG

---

#### QUESTION 5

In which fulfillment process does a specific sales order demand trigger a supply creation, and a firm link is established between the sales order and the supply?

- A. Consignment order
- B. Internal Transfer
- C. Configure to order
- D. Back-to-back
- E. Drop Ship

Correct Answer: D

The back-to-back fulfillment process is one in which specific sales order demand triggers supply creation, and a link is established between the sales order and the supply.
