#### **QUESTION 1**

Your customer wants to use Oracle Integration Cloud Service with Order Management to communicate business events. Select the option that shows the correct order in which the steps should be executed.

- A. Manage business event trigger points, create an integration, create a connection, and track business events.
- B. Track business events, manage business event trigger points, and create an integration.
- C. Manage business event trigger points, create a connection, create an integration, and track business events.
- D. You cannot use Oracle Integration Cloud service with Order Management to communicate business events.
- E. Create an integration, create a connection, and track business events.

Correct Answer: C

#### **QUESTION 2**

A furniture retailer wants its online buyers to first choose their underlying need, which will then direct them to the related list of accessories and product parts of the configurable furniture product. The retailer intends to do this by presenting standard questions to the online buyers on their needs, and then presenting the related list of accessories and parts through dynamic user interfaces.

What step is required to enable this feature?

- A. Add a supplemental structure to the root node of the item-based model in the workspace area of the Configurator.
- B. Add a supplemental structure to the option classes of the item-based model in the workspace area of the Configurator.
- C. Add a supplemental structure to the root node of the item-based model in Fusion Product Hub, and then import it into the Configurator.
- D. Add a supplemental structure at the option class level for each model product in Fusion Product Hub, and then import it into the Configurator.

Correct Answer: A

#### **QUESTION 3**

Your customer requires changes be made to the Order Management work areas. The customer would like to rearrange the tab layout and hide attributes. Which statement is true about this requirement and customizations that an administrator will be able to make?

A. An administrator can only hide attributes and cannot rearrange the tab layout.
