QUESTION 3

Which two statements are true about creating audit policies in Oracle Identity Analytics (OIA)?(Choose two.)

- A. A policy owner is specified to remediate all policy violations.
- B. All audit policies are created by specifying one or more audit rules.
- C. A primary remediator and default remediator are specified to remediate all policy violations.
- D. All audit policies are created by specifying exactly one audit rule.
- E. A data owner is specified to remediate all policy violations.

Correct Answer: CE

QUESTION 4

Which statement is true about implementing attribute-level security for user attributes in Oracle Identity Manager (OIM)? (Choose the best answer.)

- A. The authorization policy for user-defined fields (UDFs) is inherited from its parent object and cannot be changed.
- B. When a new user-defined field (UDF) is added, the User Viewer policy must be changed to allow view permission.
- C. To restrict an attribute from being seen or modified, you change its policy in OES and include the attribute in the deny list.
- D. When a new user-defined field (UDF) is added, the User Administrator policy must be changed to allow view permission.
- E. The authorization policy for user-defined fields (UDFs) is inherited from its parent object and also includes the UDF in the deny list.

Correct Answer: B

QUESTION 5

Identify a way to assign access policies to users in Oracle Identity Manager (OIM).(Choose the best answer.)

- A. Access policies are assigned to users in the User Administrationscreen.
- B. Access policies are assigned to roles during the configuration of access policies.
- C. Access policies are assigned to users during the configuration of access policies.
- D. Access policies are assigned to users when users are created.

Correct Answer: B
