QUESTION 1

Identify two settings in the Authentication Scheme definition of Oracle Access Manager 11g.

- A. Authentication Password
- B. Challenge Method
- C. Authentication Level
- D. Error Message
- E. Authentication Id

Correct Answer: BD

QUESTION 2

Your customer requires Oracle Adaptive Access Manager (OAAM) to perform risk analysis of the money transfer transactions in their eBanking application.

They have already deployed OAAM and OAM using the out-of-the-box Advanced integration.

What must they do to capture and process their application transactions in OAAM?

- A. Configure the OAAM Server application with the definition of the new transaction data to be captured.
- B. Deploy the UIO proxy and configure it to capture the money transfer transaction data and submit it to OAAM.
- C. Change their eBanking application to use OAAM native integration.
- D. Deploy the OAAM sample application and configure it to collect the money transfer transactions.

Correct Answer: A

QUESTION 3

You have configured a new pattern in Oracle Adaptive Access Manager (OAAM) to capture login times of devices. Your customer wants to ensure that devices that are used outside their normal times are blocked.

After creating your pattern, which two additional steps must you perform to configure OAAM to meet this requirement?

- A. Create a transaction definition for the pattern.
- B. Create a new rule in an existing policy that contains an appropriate condition to evaluate your new pattern.
- C. Link your chosen policy to the appropriate user groups.
- D. Configure a block action for your new rule.
- E. Restart the OAAM Managed Server for the pattern to take effect.

Correct Answer: AE

QUESTION 4

Identify two Oracle products that have a certified out-of-the-box integration with Oracle Entitlements Server 11g.

- A. Oracle API Gateway
- B. Oracle Virtual Private Database
- C. Oracle Service Bus
- D. Oracle Service Registry
- E. Oracle NoSQL Database

Correct Answer: BC

QUESTION 5

Identify three required steps for configuring OAM-OAAM basic integration.

- A. Set theOAAMEnabledproperty totrueinoam-config.xml.
- B. Target the OAAM JDBC data source to the OAM Managed Server.
- C. Protected a resource in an authentication policy using the OAAMBasic authentication scheme.
- D. Install SOA Suite and configure the UnifiedMessaging Service (UMS) delivery channel for One Time Pin (OTP).
- E. Install and configure Oracle Entitlements Server (OES).

Correct Answer: ABC
