QUESTION 4

Which three statements are correct? (Choose three.)

A. Derived/work fields and variables can be displayed on the page

B. Derived/work fields and variables provide temporary storage of calculated values

C. Derived/work fields and record fields provide permanent storage of values

D. Derived/work fields and record fields can be displayed on the page

E. Derived/work fields and record fields can include executable PeopleCode programs

Correct Answer: ADE

QUESTION 5

An end user saves the data after making a change to their personal address, and the system updates the table for that page. In this case, that personal address information is also stored in a table used to generate reports. Upon saving the address, the system also updates the equivalent information stored in the reporting table. What form of maintaining referential integrity has been implemented in this scenario?

A. Parent-child relationship

B. Occurs level

C. Prompt table edit

D. PeopleCode running a SQLExec statement

E. Expert entry

Correct Answer: C
