QUESTION 1

Which two statements correctly define the use cases for Business Process Execution Language (BPEL) vs. Business Process Modeling Notation (BPMN) vs. Enterprise Service Bus (ESB)?

- B. All are part of a typical/traditional on-premise enterprise integration strategy and can also be an important part of a hybrid on-premises/Cloud architecture.
- C. BPEL is inherently better than BPMN in managing orchestrations that involve people, because BPEL can also interact with systems.
- D. An ESB is used primarily for stateless messages and service mediation. The ESB construct is being replaced by APIs and API Gateways in modern Cloud architectures.
