- ⚙️ **100% Money Back** Guarantee
- ⚙️ **365 Days** Free Update
- ⚙️ **800,000+** Satisfied Customers

### QUESTION 1

What is a navigation flow?

- A. Functionality that enables running multiple business rules in a predetermined sequence
- B. The application home page that users will see upon logging into the application
- C. A type of report that shows variances by geography
- D. A way to promote a plan to your supervisor

Correct Answer: B

Navigation flows give application designers control over how various roles, or groups, interact with the application. The Navigation Flow Designer enables you to customize the application interface. For example, you can change the names of the cards and clusters that display on the Home page and the order in which they are displayed. You can hide cards, create new cards, and group cards into clusters.

You can also customize the vertical and horizontal tabs that display on a card.

### QUESTION 2

Which two options are true when implementing security in Enterprise Planning and Budgeting Cloud (ePBCS)? (Choose two.)

- A. Users are restricted from applications by removing application/module security
- B. ePBCS roles can be assigned to members in all dimensions
- C. The member that is set to read that has a parent with write access to all descendants will result in an access level of read
- D. A user that is assigned read and write access to a member will result in write access

Correct Answer: BD

B: Assigning Access to Members To assign access to members:

D: The application checks access permissions at each level, first by user, then by group, based on the member's access permissions inheritance relationship. If multiple access permissions exist, the least restrictive access permission is applied (for example, Write access takes precedence over Read access).

### QUESTION 3

Which feature is available only to ASO reporting cubes in Enterprises planning and Budgeting Cloud (EPBCS)?

- A. Creating and executing Calculation Manager business rules
- B. Synchronizing planning smart list from reporting cube dimensions
- C. Creating and using data maps, with ASO as either source or target
- D. creating, maintaining, and reporting on Attribute dimensions
- E. Creating, running, and scheduling Financial Reports

Correct Answer: A

---

#### QUESTION 4

Which two items are NOT provided as configurable in Enterprise Planning and Budgeting Cloud (EPBCS)? (Choose two.)

- A. Capital
- B. Public
- C. Financial Close
- D. Financials
- E. Strategic Modeling

Correct Answer: AE

Before users can start strategic planning, you must enable Strategic Modeling. There are no configuration tasks required for Strategic Modeling.

There are no configuration tasks required for Strategic Modeling.

#### QUESTION 5

Which data map is not used to move data from OEP\_WFP to OEP\_REP?

- A. Headcount Data for Reporting
- B. Compensation Data for Reporting
- C. FTE Data for Reporting
- D. Non Compensation Data for Reporting

Correct Answer: C

For complete reporting on data, Workforce provides data maps, which enable you to push consolidated data from one cube to a reporting cube. For example, you can push compensation data to the reporting cube.

The data maps are:
