QUESTION 1

An administrator needs to install a Symantec NetBackup patch to a 32-bit Windows 2003 server. Which machine should the administrator use to deploy the patch remotely?

- A. Windows 7 64-bit workstation
- B. Windows XP 32-bit workstation
- C. Linux 32-bit media server
- D. Windows 2003 64-bit client server

Correct Answer: B

QUESTION 2

Refer to the exhibit.

An organization has the requirements listed below for a server's backup data. Two copies must be retained for the same backup data. One copy must be sent to disk with a retention period of one month. A second copy must be sent to tape with a retention period of six months. The copy on disk may only be automatically deleted by Symantec NetBackup after one month. This must be configured without use of storage lifecycle policies. How can a Symantec NetBackup 7.5 administrator configure a backup policy, maximizing automation, to meet these requirements?

- A. create a basic disk staging storage unit with a fixed retention of one month and staging to tape with a retention of six months; configure the backup policy to use this disk
- B. configure the backup policy to back up to a basic disk with retention of one month; run the bpduplicate command to duplicate to tape with retention of six months
- C. configure two identical schedules for the same policy, then configure one schedule to go to a basic disk with retention of one month and configure the other schedule to go to tape with retention of six months
- D. configure the backup policy so that the schedule creates multiple copies: one to basic disk with one month retention, and one to tape with six months retention

Correct Answer: D

QUESTION 3

A site needs to perform file system backups of Solaris, Red Hat, Windows 2003, and Windows 2008 clients. Backups are initiated by the Symantec NetBackup 7.5 scheduler and the backup of specific files are also initiated by the administrators of the client hosts. Both full and differential backups must be performed. What is the minimum number of policies and schedules that must be configured?

- A. 2 policies with 3 schedules in each policy
- B. 2 policies with 4 schedules in each policy
- C. 4 policies with 2 schedules in each policy
- D. 4 policies with 3 schedules in each policy

Correct Answer: A

QUESTION 4

Which two properties apply to a policy schedule with an open window that spans multiple days? (Select two.)

- A. With frequency set to one day, the schedule will be due to run at 24 hour intervals based on the start time.
- B. A calendar based schedule will be due to run shortly after midnight each day.
- C. With frequency set to one day, the schedule will be due to run at 24 hour intervals based on last backup job completion time.
- D. A calendar based schedule will be due to run at 24-hour intervals based on last backup job completion time.
- E. With frequency set to one week, the schedule will be due to run at 7 day intervals based on last backup job completion time.

Correct Answer: AB

QUESTION 5

Which command is used to check a system's suitability for running Symantec NetBackup server software before performing an installation on a Windows system?

- A. NBValidate
- B. LiveUpdate
- C. VxValidate
- D. nbsu

Correct Answer: C
