QUESTION 1

Which type of media is able to be overwritten only when the overwrite protection level is set at None?

- A. scratch media
- B. allocated media in any media set
- C. recyclable media in any media set
- D. media imported from another Backup Exec installation

Correct Answer: B

QUESTION 2

Which two conditions contribute to achieve a high deduplication ratio? (Select two.)

- A. the percentage of data that changes is low
- B. the same file is backed up multiple times
- C. concurrent client-side and server deduplication in a backup job are enabled
- D. the majority of data are pictures and video files
- E. the percentage of data that changes is large

Correct Answer: AB

QUESTION 3

An administrator has a backup job that protects three SQL instances on the server. The third instance hosts a very important application database, so the administrator wants to ensure that instance is the first one backed up.

What is the most efficient way to ensure the application database instance is the first to be backed up?

- A. drag the application database instance to the top of the backup selections tree
- B. create a new backup job that backs up only the application database instance, and run that backup job first
- C. remove all the selections from the backup job and reselect the SQL instances in the order the backups should be performed
- D. use the ordering controls on the Selection Details page to make the application database instance the first one selected

Correct Answer: D

QUESTION 4

Which action should the administrator take prior to upgrading to Symantec Backup Exec 2014?

- A. Check for fragmentation on the target computer
- B. Run the Backup Exec Utility on the target computer
- C. Check the hardware and software compatibility list
- D. Run the Symantec Help Tool on the target computer

Correct Answer: C

QUESTION 5

An administrator is using Simplified Disaster Recovery to perform a full recovery of a Symantec Backup Exec server including the volume that contains the deduplication storage folder.

Which two conditions will exist after the recovery is performed? (Select two.)

- A. All backup sets sent to the deduplication storage folder after it was backed up will be restored.
- B. Any existing backup sets sent to the deduplication storage folder after it was backed up are unavailable.
- C. The Symantec Backup Exec media server will be fully functional, including all media devices.
- D. The deduplication storage folder logon account will need to be reset.
- E. The deduplication storage folder will need to be restored via ShadowCopyComponents.

Correct Answer: BE
