QUESTION 1

A Symantec NetBackup administrator has three media servers (named prod-media, dev-media, and test-media) that are available for client backups. The administrator would like the jobs to run to the prod-media server first, unless it is down only.

How should the administrator configure the storage?

- A. Configure three storage units and then select any available in the policy
- B. Configure a storage unit group and set the storage unit selection to prioritized
- C. Configure a storage lifecycle policy and set the selection to first available
- D. Configure the storage unit group and set the storage unit selection to failover

Correct Answer: D
