- C. An automation rule
- D. A job

Correct Answer: B

---

### QUESTION 3

Which function does each IT Management Suite 8.1. component perform?

Match the components on the left to the correct function on the right by clicking on the component and dragging it to the appropriate function.

Select and Place:

Component		Function
SQL Analysis Services		Provides a database for OLAP reporting
Notification Server		Presents business level reports
SQL Database Services		Provides a framework for IT Management Suite 8.1 functionality
Symantec Installation Manager		Allows for the management of licenses
Site Server		Communicates with the endpoints and the management server
Symantec Management Agent		Facilitates communication with the management server
SQL Reporting Services		Hosts the Symantec CMDB

Correct Answer:

Component		Function
	SQL Reporting Services	Provides a database for OLAP reporting
	Symantec Management Agent	Presents business level reports
	Symantec Installation Manager	Provides a framework for IT Management Suite 8.1 functionality
	Site Server	Allows for the management of licenses
	SQL Database Services	Communicates with the endpoints and the management server
	Notification Server	Facilitates communication with the management server
	SQL Analysis Services	Hosts the Symantec CMDB

**QUESTION 4**

Which item is available in the "Package Options" section of a software update policy?

- A. Shut down computer after remediation
- B. Allow immediate restart if required

- C. Delay until the next software update cycle
- D. Log off user after remediation

Correct Answer: B

Software Update policy "Package Options" here. Would you please advise if I should uncheck the "Allow immediate restart if required".

#### QUESTION 5

Which object can an administrator add to an organizational group?

- A. User
- B. Report
- C. Policy
- D. Data class

Correct Answer: A

Organization is added as a member of the Organization Management role group. This account can then add other members to the role group as needed.
