QUESTION 1

What statement accurately describes Folder classes and Default classes?

- A. Folder classes are used for exceptions, and Default classes are used to define how matches for traffic flows are found
- B. Folder classes are used for organization, and Default classes are used to catch unclassified traffic
- C. Folder classes and Default classes always share the same parent classes
- D. Folder classes are used to catch unclassified traffic, and Default classes are used for organization

Correct Answer: A

QUESTION 2

Why is Layer 5 through 7 traffic grouped together in the PacketShaper?

- A. To work more easily with the Citrix priority tags
- B. For ease of use with FTP, which is labeled by file name or extension
- C. Because NNTP appears only by name or type of news group
- D. To use for application classification

Correct Answer: B

QUESTION 3

Which option does Symantec recommend to
