QUESTION 2

An administrator wants to simplify the cloud configuration as much as possible. Recently the administrator was asked to simplify the blueprint creation and requesting process. The goal is to create a single blueprint that can be deployed to different cloud accounts available in the environment.

Depending on the cloud, the appropriate template should be used.

Which vRealize Automation construct can the administrator use to achieve this goal?

- A. Image Mappings
- B. Customization Specifications
- C. Flavor Mappings
- D. Storage Profiles

Correct Answer: B

QUESTION 3

Which step must an administrator take when performing a vRealize Automation manual installation using Lifecycle Manager?

- A. Configure an additional network interface
- B. Set up a certificate in the certificate locker
- C. Configure storage policies
- D. Integrate Active Directory

Correct Answer: D

QUESTION 4

Which TCP/IP port must be open and allowed on the firewall to access the vRealize Automation user interface?

- A. 8008
- B. 443
- C. 2380
- D. 6443

Correct Answer: B

QUESTION 5

An administrator is trying to create a new set of image mappings that will map to vSphere templates within a new vCenter Server cloud account. When the administrator tries to select the Windows Server 2016 image, nothing appears on the list. The administrator has confirmed that the vSphere template exists in the correct location within vCenter Server.

Which action should the administrator take to be able to create the new image mapping?

- A. Make sure the correct NSX endpoint is selected for the vCenter Server cloud account.
- B. Validate the vCenter Server cloud account credentials.
- C. Add a new capability tag to the vCenter Server cloud account.
- D. Check to make sure image synchronization is successful for the vCenter Server cloud account.

Correct Answer: C
