QUESTION 2

An administrator is tasked with creating a new vSphere and NSX blueprint for the App-Dev team. The administrator successfully configures multiple network profiles that will create different types of on-demand networks. The App-Dev team wants the blueprint to create an on-demand network that can be connected externally. Which two network types should the administrator consider using in the blueprint? (Choose two.)

- A. Routed
- B. Public
- C. Private
- D. Outbound
- E. Existing

Correct Answer: CD
