QUESTION 1

What is the function of Action-Based Extensibility (ABX)?

- A. It provides intelligent remediation and integrated compliance for security patches.
- B. It provides the capability to migrate content between instances of vRealize Automation.
- C. It provides efficient capacity and cost management for managed virtual machines.
- D. It provides a way to execute stateless functions, which contain reusable parameterized actions.

Correct Answer: D

QUESTION 2

In a vRealize Automation clustered deployment, how many Kubernetes master nodes are configured during the installation?

- A. One
- B. Two
- C. Three
- D. Zero

Correct Answer: A

QUESTION 3

An administrator is tasked with creating a new vSphere and NSX blueprint for the App-Dev team. The administrator successfully configures multiple network profiles that will create different types of on-demand networks. The App-Dev team wants the blueprint to create an on-demand network that can be connected externally. Which two network types should the administrator consider using in the blueprint? (Choose two.)

- A. Routed
- B. Public
- C. Private
- D. Outbound
- E. Existing

Correct Answer: CD

QUESTION 4

What are two prerequisites a vRealize Automation standard deployment? (Choose two.)

- A. IPv6 addresses
- B. DHCP server
- C. IPv4 addresses
- D. Load Balancer
- E. DNS server

Correct Answer: DE

QUESTION 5

An administrator wants to use constraint tags to deploy blueprints to a particular storage with a capability tag assigned; however, not all projects have access to this storage.

Which two tag formats can be defined at the blueprint level in order to ensure that blueprints are deployed on this particular storage, whenever possible, and fail if not available? (Choose two.)

- A. key:value:soft
- B. key:value
- C. value:key
- D. key:value:hard
- E. !key:value

Correct Answer: BD
