QUESTION 1

What component would an administrator use to manage vRealize Automation cluster settings?

- A. VAMI
- B. Cloud Assembly
- C. vracli
- D. vRealize Suite Lifecycle Manager

Correct Answer: C

QUESTION 2

What are two advantages of using vRealize Automation on-premises over vRealize Automation Cloud? (Choose two.)

- A. Integrate with on-premises vRealize Operations
- B. Leverage existing VMware Identity Manager for authentication
- C. Support for on-premises vRealize Orchestrator instance(s)
- D. Support for provisioning workloads to on-premises infrastructure
- E. License key is not required

Correct Answer: AB

QUESTION 3

An administrator creates a content source to import three Cloud Assembly cloud templates into Service Broker. After some time, he is tasked with deleting the content source.

What would happen if and when this content source is deleted?

- A. All three cloud templates are deleted from Service Broker and Cloud Assembly.
- B. All three cloud templates are deleted from Service Broker.
- C. Only the content source is deleted but the cloud templates remain intact in Service Broker.
- D. Once created, a content source cannot be deleted.

Correct Answer: C

QUESTION 4

An administrator is trying to synchronize a new cloud template into the App-Dev project. The administrator copies the cloud template code directly from Cloud Assembly into a text file and uploads it into the Github repository so that it can be synchronized to the App-Dev project.

When the administrator clicks 'Synch Repos', a new cloud template does not appear.

Which step must the administrator take to allow it to synchronize from the Github repository?

- A. Add the name and version to the cloud template YAML code.
- B. Clone the cloud template
- C. Release the cloud template
- D. Upload the cloud template

Correct Answer: A
