### QUESTION 1

Application definition allows system administrators to define and manage individual applications, each with their own attributes?

The definitions allow administrators to add one or such applications to which of the following?

- A. application programs
- B. application data sets
- C. application sequences
- D. application lists

Correct Answer: C

---

### QUESTION 2

How is request routed to a "Named" Application?

- A. Session Manager uses the phase tag of a route header of the incoming request and matches it to a dial pattern then uses the associated Routing Policy.
- B. Session Manager uses the route header of the incoming request and matches it to a dial pattern then uses the associated Routing Policy.
- C. Session Manager uses the Request URI of the incoming request and matches it to a dial pattern then uses the associated Routing Policy.
- D. Session Manager uses the termination application sequence associated to the Communication Profile of the user to route the request.

Correct Answer: C

---

### QUESTION 3

Which statement describes the purpose of Timer B?

- A. Timer B determines the maximum allowable call duration.
- B. Timer B determines the length of time Session Manager allows a telephone to ring before canceling the call and routing it elsewhere.
- C. Timer B determines the maximum time period between a dispatched request and the anticipated "200 OK".
- D. Timer B determines the period of time a Session Manager waits for a response before canceling the request and perhaps routes it elsewhere.

Correct Answer: D

---

**QUESTION 4**

The Data Replication Service replicates data from the master database to local copies of the database on each Session Manager instance. It is important that the master and local database are synchronized.

How would an administrator check that the databases are synchronized?

- A. Run initDRS
- B. View the Session Manager Security Module status.
- C. Execute the '\\Test Postgres database sanity\\' maintenance test
- D. Check the status of the Replica Group

Correct Answer: C

---

**QUESTION 5**

Application definitions allow system administrators to define and manage individual applications each with their own attributes.

The definitions allow administrators to add one or more such applications to which of the following?

- A. application programs
- B. application data sets
- C. application sequences
- D. application lists

Correct Answer: C
