QUESTION 1

DRAG DROP

Match the customer issue with a VMware Horizon View solution.

Select and Place:

Customer Issue	VMware Solution
Legacy app with Internet Explorer dependency	<input type="text"/> VMware ThinApp packaging
Complicated logon script for drive mapping	<input type="text"/> VMware User Environment Manager
Misuse of licensed software	<input type="text"/> VMware AppVolumes
Install applications on stateless desktop	<input type="text"/> Writeable Volumes

Correct Answer:

Customer Issue	VMware Solution
<input type="text"/>	Misuse of licensed software VMware ThinApp packaging
<input type="text"/>	Install applications on stateless desktop VMware User Environment Manager
<input type="text"/>	Legacy app with Internet Explorer dependency VMware AppVolumes
<input type="text"/>	Complicated logon script for drive mapping Writeable Volumes

QUESTION 2

During a planning meeting for an upcoming deployment of a Horizon View 7.1 environments, these requirements were identified by an architect:

1.

Separate pools for internal and external connectivity.

2.

Applications are not to be installed in the desktop VMs.

3.

Application assignments are to be user-based.

4.

No VPN is to be used.

Which three should the architect recommend to meet the requirements? (Choose three.)

A. Use VMware Horizon View's tagging feature to identify external / internal pools.

B. Use VMware App Volumes.

C. Use ThinApp to stream the applications.

D. Use VMware User Environment Manager to define network subnets that will filter the lists of external / internal desktop pools based on the user's client ip address.

E. Use VMware NSX and deploy micro-segmentation rules that will filter the lists of external / internal desktop pools based on the user's client ip address.

F. Use Horizon Security Server.

Correct Answer: ACF

QUESTION 3

When meeting with a customer, these VM template requirements for instant-clone are determined:

1. 2 vCPU

2. 4 GB Memory

3. 20 GB OS disk

Which is the formula to design a 40% utilization strategy for 80 desktops, given the above requirements?

A. $80 * ((0.4 * 20) + 4) + 20$

B. $80 * (0.4 * 20) + 20$

C. $80 * ((0.4 * 20) + 4) + (2*20)$

D. $80 * (0.4 * 20) + (2*20)$

Correct Answer: A

QUESTION 4

A company had a security breach which resulted in stolen data. The CIO has mandated that the security team implement a data leak prevention mechanism and better control over how data is accessed and distributed. Which technology will prevent users from copying data from their Horizon View virtual desktop to their local endpoint when they are connected outside the corporate LAN?

- A. Identity Manager
- B. User Environment Manager
- C. App Volumes
- D. Unified Access Gateway

Correct Answer: D

QUESTION 5

A company wants to migrate end user applications to VMware App Volumes. The IT team creates five App Stacks using a Windows desktop VM deployed from a golden master image used for all Horizon desktop pools. Some users experience application failures with a few applications in some of the App Stacks.

What can the IT team do to resolve these application issues?

- A. Update the App Volumes Agent in the golden master image, then delete and redeploy the Horizon desktops of the users experiencing issues.
- B. Install a new copy of the same Windows operating system without any updates, patches, or service packs, and use it as the App Volumes capture VM.
- C. Refresh the Horizon desktop VMs of the users experiencing the issues.
- D. Capture each application in a single App Stack and assign each user the correct application using Identity Manager.

Correct Answer: A
