QUESTION 1

In a three-tier application with a web front-end, application middle tier, and database back- end, where is the best instrumentation point for end-to-end visibility?

- A. It is best to instrument at all tiers for maximum visibility.
- B. It is best to instrument at the web tier, since that is typically the client entry point into the application.
- C. It is best to instrument at the application tier, since it sits between the web and database tiers.
- D. It is best to instrument at the database tier, since it holds the data the client is requesting.

Correct Answer: A

QUESTION 2
