QUESTION 1

Which of the following statements about CFHP policing hierarchy is FALSE?

- A. The root arbiter can be the parent of a tier 2 arbiter.
- B. A tier 1 arbiter can be the parent of a policer.
- C. A child policer can have a priority level from 0 to 10.
- D. Weight is used by a parent arbiter to allocate bandwidth among children of equal level

Correct Answer: C

QUESTION 2

With hierarchical scheduling, up to _____ tiers are supported on the Nokia 7750 SR.

- A. 8
- B. 3
- C. 4
- D. 5
- E. 6

Correct Answer: B

QUESTION 3

Which of the following statements defines the committed information rate?

- A. It is the rate at which a traffic stream is offered to a queue.
- B. It is the rate at which packets are forwarded out of a queue.
- C. It is the minimum rate at which packets may be forwarded out of a queue.
- D. It is the maximum rate at which packets may be forwarded out of a queue.

Correct Answer: C

QUESTION 4

What type of unwanted packet drops can the proper configuration of a queue's burst-limit parameter prevent?

- A. Packet drops in the local queue resulting from traffic congestion.

- B. Packet drops on the downstream nodes resulting from traffic congestion.
- C. Packet drops in the local queue resulting from traffic bursts.
- D. Packet drops on the downstream nodes resulting from traffic bursts.

Correct Answer: C

QUESTION 5

Which of the following statements about the QoS treatment of self-generated traffic in the Nokia 7750 SR is FALSE?

- A. All self-generated traffic is assigned into forwarding class NC by default.
- B. Ingress self-generated traffic is stored in CPM queues and egress self-generated traffic is stored in IOM queues.
- C. The self-generated packets will be marked with a default DSCP value.
- D. The self-generated packets will be marked with default EXP bits.

Correct Answer: C
