QUESTION 1

You just developed a virtual, co-located Cisco VSM 7 OVA image and added a 1 TB virtual disk for media storage. You are trying to add a Media Server via Cisco VSOM and get the following error message: "The following error occurred while verifying the hardware. Operation failed. there are no media partitions on the media server.... "

Please the actions in column A below in the correct order to fix this error.

Select and Place:

You just deployed a virtual, co-located Cisco VSM 7 OVA image and added a 1 TB virtual disk for media storage. You are trying to add a Media Server via Cisco VSOM and get the following error message: "The following error occurred while verfying the hardware. Operation failed. There are no media partitions on the media server..."
Place the actions in column A below in the correct order to fix this error.

Mount partition	Step 1
Create and format partition	Step 2
Create video repository directory	Step 3
Reboot	Step 4
Add fstab entry	Step 5
"chown" partition directory	Step 6

Correct Answer:

You just deployed a virtual, co-located Cisco VSM 7 OVA image and added a 1 TB virtual disk for media storage. You are trying to add a Media Server via Cisco VSOM and get the following error message: "The following error occurred while verfying the hardware. Operation failed. There are no media partitions on the media server..."
Place the actions in column A below in the correct order to fix this error.

	Create and format partition
	Create video repository directory
	Add fstab entry
	Mount partition
	"chown" partition directory
	Reboot

QUESTION 2

What is the maximum number of internal encoder ports supported by the CPS-MSP-2RU-K9?

A. 16

B. 24

C. 32

D. 48

Correct Answer: D

QUESTION 3

What is the advantage of using multicast instead of unicast to transport the camera video stream in the Cisco Video Surveillance solution?

A. When the video stream is viewed on multiple operator workstations, the network is taxed only with single multicast stream.

B. Multicast configuration on switching and routing infrastructure is less complex than the configuration for unicast traffic.

C. You can configure one camera to stream to two media servers at the same time, for data redundancy purposes.

D. Multicast is not supported in the Cisco Video Surveillance solution.

Correct Answer: C

QUESTION 4

What does it mean when the video from a camera is black and white, but otherwise the picture is clear?

A. The IR cut filter is in place

B. The camera is not streaming the color data

C. The camera has switched to night mode

D. The camera is not getting enough power
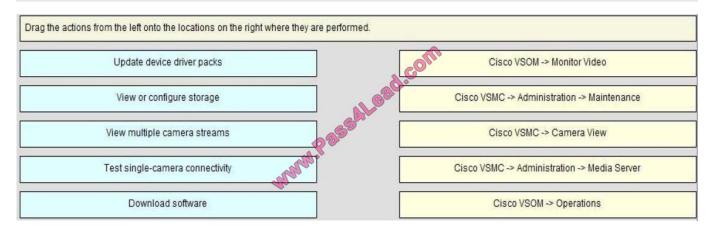

Correct Answer: C

QUESTION 5

Drag the actions from the left onto the location on the right where they are performed.
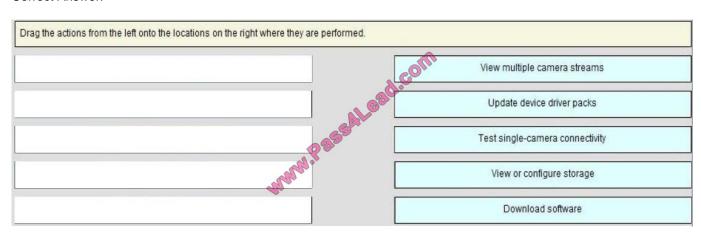

Select and Place:

Drag the actions from the left onto the locations on the right where they are performed.

4 / 5

Update device driver packs		Cisco VSOM -> Monitor Video
View or configure storage		Cisco VSMC -> Administration -> Maintenance
View multiple camera streams		Cisco VSMC -> Camera View
Test single-camera connectivity		Cisco VSMC -> Administration -> Media Server
Download software		Cisco VSOM -> Operations

Correct Answer:

Drag the actions from the left onto the locations on the right where they are performed.

		View multiple camera streams
		Update device driver packs
		Test single-camera connectivity
		View or configure storage
		Download software
