QUESTION 1

You have an Exchange Server 2010 organization. You need to recommend a storage solution that meets the following requirements:

Provides users with an alternate location for storing e-mail messages Provides users with access to the alternate location by using Outlook Web App (OWA)

What should you recommend?

A. journal rules

B. managed folders

C. personal archives

D. personal folders (.pst)

Correct Answer: C

QUESTION 2

A corporate environment includes Exchange Server 2010 SP1 and Active Directory Domain Services (AD DS).

Members of the Legal security group must be able to do the following:

Perform keyword searches across all mailboxes.

Store the search results in a secure mailbox.

You need to recommend a solution that meets the requirements.

Which two actions should you recommend? (Each correct answer presents part of the solution.

Choose two.)

A. Perform searches from the Exchange Control Panel, and export search results to a discovery mailbox.

B. Add members of the Legal security group to the Organization Management role group.

C. Perform searches by running the Export-Mailbox cmdlet, and export search results to a discovery mailbox.

D. Add members of the Legal security group to the Discovery Management role group.

Correct Answer: AD

QUESTION 3

A corporate environment will include Exchange Server 2010.

You need to recommend a solution that meets the following client access requirements:

Automatic failover of specific client access protocols Distribution of client access traffic across multiple Client Access servers Secure Sockets Layer (SSL) session ID for clienttoClient Access server affinity

What should you recommend?

A. Deploy a Client Access server array.

B. Deploy Microsoft Forefront Unified Access Gateway (UAG) as a reverse proxy.

C. Deploy a hardware load balancer for the Client Access servers.

D. Deploy Microsoft Forefront Threat Management Gateway (TMG) as a reverse proxy.

Correct Answer: C

Hardware Load Balancing If you have more than eight Client Access servers in a single Active Directory site, your organization will need a more robust load balancing solution. Although software load balancing solutions available, a hardware load balancing solution provides the most capacity solutions, see Microsoft Unified Communications Hardware Load Balancer Deployment. For more information about Exchange 2010 server solution, see Microsoft Unified Hardware Load Balancing Hardware Load Balancer Deployment.

Hardware load balancers support very high traffic throughput and can be configured to load balance in many ways. Most hardware load balancer vendors have documentation about how their product works with Exchange 2010. The simplest way to configure hardware load balancers is to create a fallback list of the be applied by the load balancer. For example, the load balancer will try cookie-based affinity first, then SSL session ID, and then source IP affinity.

QUESTION 4

A corporate environment includes Active Directory Domain Services (AD DS). The environment consists of an internal network and a perimeter network. AD DS is deployed only on the internal network.

The company intends to utilize a service providers cloud-based Exchange Server 2010 SP1 email service. You have the following requirements:

Maximize the security of the design.

Use the minimum permissions required to perform directory synchronization.

You need to recommend a solution for directory synchronization between the corporate environment and the service providers environment.

Which two actions should you recommend? (Each correct answer presents part of the solution.)

Choose two.)

A. Install the directory synchronization tool on a computer in the perimeter network.

B. Install the directory synchronization tool on a computer on the internal network.

C. Create a directory synchronization service account with membership in the Domain Users group.

D. Create a directory synchronization service account with membership in the Domain Admins group.

Correct Answer: BC

QUESTION 5

You are evaluating the implementation of Exchange Server 2010 SP1 Edge Transport servers and Hub Transport servers.

You need to recommend a solution to ensure that the Exchange Server 2010 SP1 servers can queue email messages for tailspintoys.com.

What should you include in the recommendation?

A. an external relay domain

B. an authoritative domain

C. a remote domain

D. an email address policy

Correct Answer: A
